

mObridge Product Features

Product Series ▶ M1000-M-DAB ▶ MOST® BUS DAB | DAB+

The mObridge M1000-M-DAB unit is designed to bring you CD quality radio into your vehicle. We have utilized a Digital Signal Processor to correctly clock the digital audio into the vehicle bus network. mObridge are the only manufacturer of DAB interfaces that keep the digital audio from the radio in the digital domain thus delivering the highest quality product for MOST bus equipped cars. The DAB 12V active antenna gain has it's own voltage regulator for the best possible reception. The M1000-M-DAB where possible has tried to use alternative interfaces into the vehicle bus so users can retain the CD changer. With the use of DIP switches there are a multitude of configurations available to installers.

Features Include

CD-QUALITY AUDIO

Delivers high-fidelity CD-quality audio your factory car stereo.

DIGITAL SIGNAL PROCESSOR

Digital Audio Clock Synchronization.

FIRMWARE UPGRADEABLE
